EDUCATION

University of Washington

Sept. 2024 – June 2028

B.S. Computer Science, Paul G. Allen School | Minor in Business Administration, Foster School Seattle, WA

Relevant Coursework: Data Structures & Algorithms, Computer Systems, Discrete Mathematics, Linear Algebra, Probability & Statistical Modeling, Financial & Managerial Accounting

Honors: Dean's List Recipient

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML/CSS, SQL

Frameworks & Tools: Spring Boot, Spring WebFlux, Netty, Git, Maven, Linux/Unix, Tableau

Systems & Concepts: Active Directory, REST APIs, Reactive Programming, Microsoft 365, Relational Schemas

PROFESSIONAL EXPERIENCE

Computer Support Technician

June 2026 – Present

UW Medicine Dean of Medicine IT

Seattle, WA

- Provisioned, imaged, and updated hardware deployment pipelines and operating systems for enterprise desktop and laptop fleets.
- Resolved tier-1/2 support tickets spanning user account creation, admin-privileged software deployment, network printer connectivity, and Zoom conferencing.
- Facilitated end-to-end user onboarding by managing system permissions, conducting setup sessions, and configuring hardware, docking stations, and multi-monitor displays.
- Utilized Active Directory to manage account lifecycles and deprecations, while designing Excel inventory databases to audit hardware assets and vendor packing slips.

CSE 123 Teaching Assistant

March 2026 – Present

Paul G. Allen School of Computer Science & Engineering, University of Washington

Seattle, WA

- Supported 300+ students in CSE 123 by leading weekly quiz sections for ~15 students, facilitating practice problems on data structures, recursion, and OOP in Java.
- Evaluated weekly programming assignments for ~20 students, providing detailed written feedback on program logic and efficiency.
- Staffed the Introductory Programming Lab (IPL) 1 hour per week, offering real-time debugging and conceptual support across CSE 12x assignments.
- Collaborated with course staff in weekly 2.5-hour syncs and grading meetings to maintain consistent instruction standards and fair evaluation.

PROJECTS

NYT Bestsellers Analytics Platform | *Java, Spring Boot, Spring WebFlux, Netty, JavaScript*

July 2026

- Built a non-blocking REST API using Spring WebFlux to concurrently aggregate real-time data from the New York Times and Google Books APIs.
- Implemented a multi-tier fallback search pipeline (ISBN lookup → Title/Author search → Open Library CDN) to maximize cover image match rates across bestseller categories.
- Optimized asynchronous network calls and resolved Netty transport dependencies to support high-throughput data retrieval on ARM architectures.
- Designed a responsive single-page dashboard with interactive modal drawers and custom typography.

Seattle Sidewalk Accessibility Analysis | *JavaScript, Tableau, Geospatial Data Analysis*

February 2026

- Analyzed 1,000+ spatial data points from the open-source Project Sidewalk dataset to quantify and map pedestrian infrastructure barriers across Seattle neighborhoods.
- Engineered an accessibility scoring system to evaluate barrier severity and aggregate neighborhood risk profiles.
- Designed interactive Tableau dashboards to visualize barrier frequency, type, and geographic distribution.
- Presented data-driven infrastructure recommendations as part of the DubsTech Datathon 2026.
