EDUCATION

University of Washington September 2024 - June 2028

B.S. in Computer Science | *Minor in Business Administration* Seattle, WA

Honors: Dean's List Recipient

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Data Management, Artificial Intelligence, Discrete Mathematics, Linear Algebra, Statistics & Probability, Finance, Marketing

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML/CSS, JavaScript/TypeScript, SQL
Frameworks & Libraries: Spring Boot, Spring WebFlux, React, Node.js, Tailwind CSS
AI & Developer Tools: Git, Maven, Figma, Linux/Unix, Tableau, GitHub Copilot, Claude Code

PROFESSIONAL EXPERIENCE

UW Paul G. Allen School | *Undergraduate Teaching Assistant* | Seattle, WA March 2026 – Present

- Taught weekly course sections on data structures, recursion, and object-oriented programming in Java for a 300+ student introductory computer programming course.
- Graded 30+ Java assignments per week with written feedback on program logic and efficiency, maintaining consistency with professors and course staff in weekly grading meetings.
- Debugged student code in real time during office hours, guiding students through CSE 12x assignments.

UW Medicine | *Computer Support Technician* | Seattle, WA June 2026 – September 2026

- Resolved 15+ tier-1/2 tickets per week covering account access, software deployment, printer connectivity, and Zoom, keeping department staff productive.
- Imaged and updated 30+ desktops and laptops per week, onboarded new hires, and built Excel databases to audit department inventory.

PROJECTS

Locked In | *Java, Spring Boot, PostgreSQL, React, TypeScript* October 2026

- Built a fantasy-league habit-tracking web app adopted by 10+ users, where friend groups of up to 15 compete on a shared weekly goal through live leaderboards and monthly awards.
- Developed the full Java backend, designing REST APIs and a PostgreSQL schema for users, leagues, memberships, and progress logs consumed by a React/TypeScript frontend.
- Engineered a scoring engine awarding points for progress, weekly goal completion, and streaks, powering daily leaderboard rankings and end-of-month MVP results.
- Pitched the product to industry judges from Amazon, Visa, and T-Mobile at DubHacks 2026, demoing the live app.

Seattle Sidewalk Accessibility Analysis | *JavaScript, Tableau, Geo-spatial Data Analysis* February 2026

- Quantified pedestrian barriers across Seattle by analyzing Project Sidewalk data in JavaScript and Tableau for 1,000+ spatial data points across 50+ neighborhoods.
- Made neighborhood risk comparable by engineering a severity-based accessibility scoring system for 50+ neighborhoods ranked across 5 different barrier types.
- Presented findings to technical and non-technical audiences by building interactive Tableau dashboards and presenting recommendations to industry judges from Amazon, AWS, Microsoft, Oracle, and T-Mobile at DubsTech Datathon 2026.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Ascend Consulting Group | *AI & Startup Consultant* October 2026 – Present

- Consultant for a nation-wide consulting organization that partners UW students with founders and early-stage startups on consulting engagements.
- Participated in professional development and case-based training in problem structuring and business analysis in preparation for client projects with AI and startup clients.

Chi Sigma Alpha National Sorority Inc. | *PR & Marketing Chair* September 2024 – Present

- Secured product sponsorships from brands for recruitment, retreats, and internal events as PR & Marketing Chair.
- Planned and ran 8 recruitment events for 60+ rushees as Winter 2026 Recruitment Chair, coordinating partner organizations and interviews; organized the chapter's formal as 2026 Installations Chair.

Women in Computing | *Active Member* September 2026 – Present

- Attended networking, social, and professional development events to build connections with peers and industry professionals in tech.
