EDUCATION

University of Washington

Expected Graduation: June 2028

B.S. Computer Science | Minor in Business Administration

Seattle, WA

Honors: Dean's List Recipient

Relevant Coursework: Finance, Marketing, Technical Writing, Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Data Management, Discrete Mathematics, Linear Algebra, Statistics & Probability

TECHNICAL SKILLS

Languages: SQL, Java, Python, C/C++, HTML/CSS, JavaScript/TypeScript

Frameworks & Libraries: Spring Boot, Spring WebFlux, React, Node.js, Tailwind CSS, Netty

AI & Developer Tools: Tableau, Git, Maven, Figma, Linux/Unix, GitHub Copilot, Claude Code

PROFESSIONAL EXPERIENCE

UW Paul G. Allen School | Undergraduate Teaching Assistant | Seattle, WA

March 2026 – Present

- Improved learning outcomes for a 300+ student course through weekly quiz sections and office hours on data structures, object-oriented programming, and recursion.
- Developed consistent grading standards across course staff by providing structured written feedback and attending weekly staff and grading meetings, for 30+ submissions per week.
- Supported students by staffing the Introductory Programming Lab (office hours) and debugging in real time.

UW Medicine | Computer Support Technician | Seattle, WA

June 2026 – September 2026

- Minimized downtime for clinical and administrative staff by triaging and resolving tier-1/2 tickets across accounts, software, printing, and Zoom, for 15+ tickets per week.
- Streamlined new-user onboarding by standardizing new-hire appointments, permissions, and configuring workstations to support new employees.
- Reduced asset-tracking errors by building Excel databases to audit inventory, update management on department specific inventory, and optimize organization of new and used hardware.

PROJECTS

NYT Bestsellers Analytics Platform | Java, Spring Boot, Spring WebFlux, Netty, JavaScript

July 2026

- Built a non-blocking REST API using Spring WebFlux to concurrently aggregate real-time data from the New York Times and Google Books APIs.
- Implemented a multi-tier fallback search pipeline (ISBN lookup to Title/Author search to Open Library CDN) to improve the match rate and limit null images.
- Maximized retrieval consistency on ARM by speeding up API calls and resolving Netty transport dependencies to minimize concurrent requests failures.
- Designed a responsive single-page dashboard with interactive modal drawers and custom typography.

Seattle Sidewalk Accessibility Analysis | JavaScript, Tableau, Geospatial Data Analysis

February 2026

- Turned raw accessibility data into decision-ready recommendations by scoring barrier severity across Seattle neighborhoods with 1,000+ data points across 50+ neighborhoods.
- Simplified findings for non-technical stakeholders to make decisions by designing interactive Tableau dashboards for barrier frequencies, types, and locations.
- Presented infrastructure recommendations to industry judges from Amazon, AWS, Microsoft, Oracle, and T-Mobile at DubsTech Datathon 2026 in a field of 50+ teams.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- Chi Sigma Alpha National Sorority Inc.** | *PR & Marketing Chair, Winter 2026 Recruitment Chair, Installations Chair*
