EDUCATION

University of Washington

Expected Graduation: June 2028

B.S. Computer Science | Minor in Business Administration

Seattle, WA

Honors: Dean's List Recipient

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Data Management, Discrete Mathematics, Linear Algebra, Statistics & Probability, Finance, Marketing

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML/CSS, JavaScript/TypeScript, SQL

Frameworks & Libraries: Spring Boot, Spring WebFlux, React, Node.js, Tailwind CSS, Netty

AI & Developer Tools: Git, Maven, Figma, Linux/Unix, Tableau, GitHub Copilot, Claude Code

PROFESSIONAL EXPERIENCE

UW Paul G. Allen School | *Undergraduate Teaching Assistant* | Seattle, WA

March 2026 – Present

- Developed understanding of data structures, recursion, and object-oriented programming in Java by teaching weekly quiz sections and facilitating practice problems, of students across a 300+ student course.
- Evaluated student code quality by grading weekly Java assignments and providing written feedback on program logic and efficiency for 30+ submissions per week.
- Supported students on CSE 12x assignments by staffing office hours and diagnosing code errors in real time.
- Maintained consistent grading and instruction across a 300+ student course by attending weekly staff and grading meetings with course staff and professors.

UW Medicine | *Computer Support Technician* | Seattle, WA

June 2026 – September 2026

- Maintained desktop and laptop fleets deployment-ready by provisioning, imaging, and updating hardware and operating systems for 30+ devices per week.
- Supported productivity of staff by resolving tier-1/2 tickets (accounts, admin software deployment, printer connectivity, Zoom), in 15+ tickets per week.
- Reduced asset-tracking errors by building Excel databases to audit inventory, update management on department specific inventory, and optimize organization of new and used hardware.
- Expedited new-hire readiness by managing permissions in Active Directory, onboarding new users, and configuring workstations to support new employees.

PROJECTS

NYT Bestsellers Analytics Platform | *Java, Spring Boot, Spring WebFlux, Netty, JavaScript*

July 2026

- Delivered real-time bestseller data with a non-blocking REST API by using Spring WebFlux to concurrently aggregate the NYT and Google Books APIs, merged across 4 different categories.
- Raised cover-image coverage by building a 3-tier fallback pipeline (ISBN lookup to Title/Author search to Open Library CDN) to improve the match rate and limit null images.
- Maximized retrieval consistency on ARM by speeding up API calls and resolving Netty transport dependencies to minimize concurrent requests failures.

Seattle Sidewalk Accessibility Analysis | *JavaScript, Tableau, Geo-spatial Data Analysis*

February 2026

- Quantified pedestrian barriers across Seattle by analyzing Project Sidewalk data in JavaScript and Tableau for 1,000+ spatial data points across 50+ neighborhoods.
- Made neighborhood risk comparable by engineering a severity-based accessibility scoring system for 50+ neighborhoods ranked across 5 different barrier types.
- Presented findings to technical and non-technical audiences by building interactive Tableau dashboards and presenting recommendations to industry judges from Amazon, AWS, Microsoft, Oracle, and T-Mobile at DubsTech Datathon 2026.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- **Chi Sigma Alpha National Sorority Inc.** | *PR & Marketing Chair, Winter 2026 Recruitment Chair, Installations Chair*
